Our IT rental programmes make it possible to **respond at speed and at scale** to fast-changing production needs in a compliant and sustainable way.

From features films to TV documentaries, web shorts and commercials, our AV & IT rental services give you everything you need to ensure your production runs smoothly.

Experienced at helping film sets, studios, prop houses and production companies bring their vision to life on time, on budget, and with zero drama, we deliver all the flexibility and control today's production teams need.

With Hamilton Rentals you can:

- **Hire what you want, for as long as you need it** – simply extend or return equipment early should project parameters or schedules change.
- **Avoid technology purchases and optimise the sustainability of your production.**
- **Take advantage of technology that is shipped and installed directly to set** – we'll handle all the logistics on your behalf, no matter where in the world you are filming.
- **Add visual effects to film and TV sets with minimal financial outlay.**
- **Utilise our engineers to set up according to your instructions** – releasing your personnel to focus on other tasks.
- **Benefit from 24x7 technical support and an extra mile approach** – that ensures you achieve first time, every time outcomes.

A tailor made approach

From Wimbledon coverage to big film sets like Barbie, we've supplied IT and AV equipment for a huge variety of different production use cases.

Our extensive hardware fleet features the latest models as well as older generation, harder to find technologies. Plus, we offer a fast turnaround on orders that includes **next day delivery on set.**

From start to finish, we are experts at helping production teams to get the job done.

Our services include:

- **Technology prop hire** – if you're looking to visualise a fully functioning office, command room or call centre of any size, show technology in a home environment, a fully stocked server room with lights and cabling or video walls, interactive consoles for game and chat show environments, we can help.
- **Server rental for production rendering** – we can stage and install a secure server environment at your chosen location and help you scale up your processing and storage capabilities as required.
- **Workstation hire for SFX production** – utilise our high performance PCs and laptops to create visual effects.
- **TV rental or screen rental** – ideal for scene playback on set or cue cards and teleprompters on set.

As well as supplying IT and AV rental equipment to production teams working on everything from blockbuster movies to episodic TV, outside broadcasts, and streaming series, we've also helped out in a range of other creative environments – including live West End theatre productions, film premiers and road shows.

Our professional approach and industry know-how has seen us become the provider of choice for many leading UK broadcasters, production houses and international studios.

Contact us

With over 35 years of experience, Hamilton Rentals delivers Technology and IT services to organisations and events of every shape and size. Our capabilities cover technology provision, engineering, logistics, consulting, project and managed services, and asset retirement, making us perfectly positioned to help with your IT and AV requirements.
